

Like all Pullout Cabinets, FC14X24 features a series of slots. Sliders or brackets snap into the slots and optional shelves or mini drawers snap onto the sliders or brackets.

It will carry your electronic components, laptop or printer and can act as a power station for all things that need to be charged. It is sized exactly like our narrow 2 drawer cabinet and will line up with any of our 14.5" high cabinets. FC14X24 holds a single stack of components and has 10.5" of available vertical height when used with a stationary base shelf or 8.5" of available height when a pullout shelf is used. There is a generous wiring cutout at the back. FC14X24 will also accommodate three mini drawers making it a very useful and versatile storage cabinet.

Narrow shelves and mini drawers are sold separately.

FEATURES

- Flip door keeps electronics dust-free and out of sight
- Flip door is out of the way when the cabinet is open
- Available with key lock for added safety and security
- Series of slots accept optional shelves or drawers
- Provides dust free space efficient storage
- Adjustable feet levelers provide stability and lift the cabinet off the floor. The levelers rest in dimples topside for positive positioning when stacking
- Includes hardware for connecting when stacking
- Large rear wiring cutout fitted with plastic bushing
- Available in 18 powder coat colors.

FC14X24 is available in our standard width version as FDCAB14 and works just like our standard width pullout cabinets, just narrower! Line it up next to our standard '14 Series' cabinets to reach any width or stack FC14X24 with any narrow cabinet to reach virtually any height. Optional pullout and stationary shelves provide the flexibility to create versatile AV or computer setups - with keyboard trays and rollout work surfaces at just the right height. An optional key lock is available. Outfit this cabinet with tops, legs or wheels for mobility.

MATCHING CABINETS

The FC14X24 is the same height and depth as standard width '14 Series' cabinets - MC2D14, HFCAB14, COM3D14, CAB14 and FDCAB14. It shares the exact dimension of M2D14X24, 2-drawer cabinet shown in the picture. This is useful when designing configurations that need to line up.
