

Like all pullout cabinets, FC20X24 features a series of slots. Sliders or brackets snap into the slots and optional shelves or mini drawers snap onto the sliders or brackets. It will carry your electronic components, laptop or printer and can act as a power station for all things that need to be charged. It is sized exactly like our narrow 3-drawer cabinet and will line up with any of our 20.5" high cabinets. FC20X24 holds a single stack of components and has 16.5" of available vertical height when used with a stationary base shelf or 14.5" of available height when a pullout shelf is used. There is a generous wiring cutout at the back. FC20X24 will also accommodate six mini drawers making it a very useful and versatile storage or parts cabinet.

Narrow shelves and mini drawers are sold separately.

FC20X24 is available in our standard width version as FDCAB20 and works just like our standard width pullout cabinets. Line it up next to any '20 Series' cabinet to reach any width or stack FC20X24 with any narrow cabinet to reach the desired height. Optional mini drawers and pullout and stationary shelves provide the flexibility to create versatile AV or computer setups - with keyboard trays and rollout work surfaces right where you want them. An optional key lock is available. Finish it off with a metal or mica top. Add legs for lift or wheels for mobility.

*Shown here next to MC3D20, on legs with a metal top*

#### FEATURES

- Flip door keeps electronics dust-free and out of sight
- Flip door is out of the way when the cabinet is open
- Available with key lock for added safety and security
