

CD / DVD / Blu-ray Storage

Can-Am provides high density, high capacity CD, DVD and Blu-ray storage at its best. Each 6" drawer holds 270 CDs or 120 DVDs/Blu-ray. And that's in standard packaging. 540 CDs per drawer in slimline cases. Over a thousand discs in sleeves or pouches.

We have two, three and four drawer cabinets to choose from. And they stack so you can achieve any combination up to nine drawers high. That adds up to 2400 CDs in three feet - 7500 in sleeves. And full extension sliders ensure access to every one of them. Dust-free and secure.

Two, three and four drawer cabinets can be combined to form just the right configuration. A fully loaded cabinet can weigh three hundred pounds and a stack could weigh over a thousand pounds. Our product is steel, our strength is a commitment to safety, quality and service.

Can-Am media cabinets are the choice of studios, professionals, corporate archives and serious collectors all around the world. Safety interlocking drawers allow only one drawer to open at a time, to prevent tipping. C-clamps connect stacked cabinets to each other. A unique divider and backstop system keeps everything under control, and key locks provide security. Adjustable levelers lift and stabilize the cabinet or rest in dimples topside for positive positioning when stacking.

Dust-free space efficient storage at its best. Team media cabinets up with stereo cabinets for an amazing AV center. Choose from 18 colors and relax - you can't outgrow Can-Am cabinets. They grow with you. And rest assured we'll be there when you need more. We know how to build great cabinets and we know how to get them to you. We've been doing that since 1979.
